RE: BRIEF EXPLANATION ABOUT OUR PROJECT AND SOME OF OUR CURRENT PROJECTS THAT REQUIRE FUNDING

Marian Apostle Mission is a Christian based Charitable Organization registered in Kenya under the society acts and as well as registered trustee that takes care of orphans, vulnerable children and marginalized groups in east and central part of Kenya under the stewardship of Fr. Gonzalo Maria, a volunteer missionary priest.

The organization has assisted in accommodating, feeding, clothing, educating and caring for over 100 orphans albeit a myriad of challenges e.g. use of rented premises and home based programs which sometimes do not give the expected results.

Our greater vision for the organization is to build a fully-fledged community center comprising of an orphanage and home for the aged, kindergarten, primary, secondary school, vocational training institute, health centre, formation center for youths and adults who are willing to embrace religious and pastoral life and a farm project for sustainable agriculture. These will help impart children, youth and community at large with knowledge and resources which will enable them to be self-reliant in future.

We have already managed to acquire approximately 10 acres of land at Mavoloni area which we intend to use for this project and we are now pleading with friends, well-wishers and donors for support to enable us fulfill this great dream.

We also have a sister organization, Marian Apostle Foundation, spearheaded by Fr. Gonzalo Maria operating in South East of Nigeria with the same objective.

ORGANIZATION PROFILE

BACKGROUND

Marian Apostle Mission was founded by a missionary priest with the aim of working with children, families and their communities to reach their full potential by tackling the causes of poverty and injustices, thus breaching the gap between the rich and the poor in the society as well as to improve moral behavior among the youth in the society.

MISSION

Our mission is to facilitate the development of communities which have low or no access to resources to enable them improve their general livelihood, through community

support services from promoting rights based and value based approaches as well as active participation of both children, youth and women.

VISION

To help communities realize and utilize their full potential in improving and sustaining decent levels of livelihoods through access of quality education, health and food security through sustainable agriculture. Our project is strategically designed to address complex challenges presented by high levels of poverty in Kenya at the community level through a communal approach.

Current program components include:-

- Food relief services
- Education support for underprivileged students.
- Focus on children, youth and women.
- Capacity building.
- Advocacy issues affecting children and the family at large.
- Empower women (single mothers) set up small scale businesses.

Ongoing programs components include:-

- ***Provide clean water to the community by drilling borehole.***

So far we have managed to drill 2 boreholes one in our farm in Kenya with a solar system installation and another one in Ehime Mbano in Imo State, Nigeria.

We want to replicate the same in Ubaha and Amaoye Community in Amaofuo, Imo State once the funds are available. The project is expected to take 2/3 weeks to complete. The estimated amount for the project is €5,000 inclusive of drilling of borehole, installation of solar system, a generator for back up and the construction of a water reservoir with a capacity of 30,000 litres.

- ***Construction of a Chapel***

We intend to construct a chapel in our ground. The current one is very small and can only host a small number of congregants. We already have the plan and the quotation for the construction which will be attached.

- ***Purchase of motor vehicle***

We require a motor vehicle for missions which we serve and for the farm projects. For this, a double cabin pick up was suggested since it can carry people and at the same time be used to ferry farm produce. We have identified a used Toyota Hilux double cabin pick up in good condition at a price of €6,000.
